AT THE COURT AT WINDSOR,

The 14th day of February, 1883.

PRESENT:

The Queen's Most Excellent Majesty in Council.

WHEREAS by "The Merchant Shipping Act Amendment Act, 1882," it is enacted that whenever it is made to appear to Her Majesty that the rules concerning the measurement of tonnage of merchant ships for the time being in force under "The Merchant Shipping Act, 1854," therein called the principal Act, have been adopted by the Government of any foreign country, and are in force in that country it shall be lawful for Her Majesty, by Order in Council, to direct that the ships of such foreign country shall be deemed to be of the tonnage denoted in their certificates of registry or other national papers, and thereupon it shall no longer be necessary for such ships to be re-measured in any port or place in Her Majesty's dominions, but such ships shall be deemed to be of the tonnage denoted in their certificates of registry or other papers, in the same manner, to the same extent, and for the same purposes, in, to, and for which the tonnage denoted in the certificates of registry of British ships is to be deemed the tonnage of such ships:

And whereas Her Majesty, by Order in Council, dated the 30th day of September, 1873, was pleased to direct that merchant, sailing, and steam ships, belonging to the Kingdom of Italy, the measurement whereof had, after the first day of July, one thousand eight hundred and seventy-three, been ascertained and denoted in the registers and other national papers of such ships testified by the dates thereof, should be deemed to be of the tonnage denoted in their registers or other national papers, in the same manner, and to the same extent, and for the same purposes, in, to, and for which the tonnage denoted in the certificates of registry of British ships is deemed to be the tonnage of such ships; provided, nevertheless, that if the owner or master of any Italian steamship should desire the deduction for engine-room in such ship to be estimated under the rules for engine-room measurement and deduction applicable to British ships instead of under the

Her Majesty is hereby pleased by and with the advice of Her Privy Council, to direct that the steam ships of Italy, the certificates of Italian nationality and registry of which are dated on or after the 21st day of September, 1882, shall be deemed to be of the tonnage denoted in the said certificates of Italian nationality and registry.

C. L. PEEL.

WHEREAS by "The Merchant Shipping Act Amendment Act, 1862," it is enacted that whenever it is made to appear to Her Majesty that the rules concerning the measurement of tonnage of merchant ships for the time being in force under the Merchant Shipping Act, 1854, therein called the principal Act, have been adopted by the Government of any foreign country, and are in force in that country, it shall be lawful for Her Majesty, by Order in Council to direct that the ships of such foreign country shall be deemed to be of the tonnage denoted in their certificates of registry or other national papers, and thereupon it shall no longer be necessary for such ships to be re-measured in any port or place in Her Majesty's dominions, but such ships shall be deemed to be of the tonnage denoted on their certificates of registry or other papers in the same manner, to the same extent, and for the same purposes, in, to, and for which the tonnage denoted in the certificates of registry of British ships is to be deemed the tonnage of such ships :

And whereas Her Majesty, by Order in Council, dated the 30th day of September, 1873, was pleased to direct that merchant, sailing, and steam ships, belonging to the Kingdom of Italy, the measurement whereof had, after the first day of July, one thousand eight hundred and seventy-three, been ascertained and denoted in the registers and other national papers of such ships testified by the dates thereof, should be deemed to be of the tonnage denoted in their registers or other national papers, in the same manner, and to the same extent, and for the same purposes in, to, and for which the tonnage denoted in the certificates of registry of British ships is deemed to be the tonnage of such ships ; provided nevertheless, that if the owner or master of any Italian steamship should desire the deduction for engine-room in such ship to be estimated under the rules for engine-room measurement and deduction applicable to British ships instead of under the Italian rule, the engine-room should be measured and the deduction calculated according to the British rules :

And whereas Her Majesty, by Order in Council, dated the 14th day of February, 1883, was pleased to declare that (the rules for engine-room measurement and deduction applicable to the steamships of Italy, having been modified by Royal Decree of His Majesty the King of Italy, dated the 30th day of July 1882), the steamships of Italy, the certificates of Italian nationality and registry of which were dated on or after the 21st day of September 1882, should be deemed to be of the tonnage denoted in the said certificates of Italian nationality and registry.

GOVERNMENT OF INDIA.
PUBLIC WORKS DEPARTMENT.
CIVIL WORKS—Irrigation.

Calcutta, the 18th January, 1894.

Read—

Revenue Report of Irrigation Works in Rajputana for the year 1892-93, forwarded with letter No. ²⁶³ C S., dated the 12th October, 1893, from the Secretary to the Agent to the Governor General and Chief Commissioner, Rajputana, Public Works Department.

OBSERVATIONS.—The rainfall in the year 1892-93 was abnormally heavy; but the monsoon broke late, and the kharif crops were comparatively poor. After July the tanks, both in Ajmere and Merwara, filled well, and the *rabi* harvest was a particularly good one in consequence. The average rainfall in the Ajmere and Merwara Districts was 37.28 and 37.33 inches, and exceeded that of the previous year by 28.77 and 27.09 inches respectively. The average rainfall during the ten years ending 1890-91 was 21.42 inches for Ajmere and 18.76 inches for Merwara District.

2. The capital outlay during the year amounted to Rs. 3,71,786 (including indirect charges) on new tanks; these were not finally made over to the Revenue Department for irrigation purposes before the close of the year under review. The total capital expenditure on the three groups of tanks to the end of the year amounted to Rs. 22,68,461.

3. The following statement shows the actual financial results of the year under review as given in the Revenue Accounts :—

Tanks in	Total Capital outlay to end of year, including indirect charges	GROSS REVENUE COLLECTED.			WORKING EXPENSES.			Net Revenue.	Percentage of net Revenue on capital to end of year.
		Irrigation Revenue	Miscellaneous receipts.	Total.	Direct.	Indirect.	Total.		
Ajmere Sub-Collector-etc.	14,15,560	38,587	890	39,477	67,474	1,614	69,088	-29,611	...

Todgurh Sub-Collect-orate.	2,12,238	21,519	194	21,713	15,999	362	16,361	5,352	2.52
Total, 1892-93	22,68,461	90,024	1,965	91,989	96,571	2,278	98,849	-6,860	...
Total for 1891-92	18,96,675	83,096	1,772	84,868	1,04,538	2,165	1,06,703	-21,835	...

The irrigation revenue collected was made up as follows :—

	1892-93.	1891-92.
	Rs.	Rs.
Water-rates directly paid	4,064	6,852
Share of enhanced land revenue	85,960	76,244
TOTAL	90,024	83,096

The share of enhanced land revenue is made up of water-rates, share of well assessments, and the difference between dry and wet rates which are collected with the land revenue.

4. The revenue assessed for the year is compared in the following table with the area irrigated. The increase of Rs. 41,482 over the assessment of the

year 1891-92 is due to the tanks having received a good supply of water during the year under review :—

Sub-Collectorate.	Irrigation Revenue assessed.	AREA.			Assessment per acre.
		Irrigated.	Protected.	Total.	
	Rs.	Acres.	Acres.	Acres.	Rs.
Ajmere	58,006	10,052	7,079	17,131	3.38
Beawar	44,457	6,772	7,103	13,875	3.20
Todgurh	25,230	3,087	2,287	5,324	4.74
Total, 1892-93 . .	1,27,693	19,911	16,419	36,330	3.51
Total for 1891-92 . .	86,261	7,710	4,277	11,987	7.20

The irrigation revenue assessed includes all assessments due on protected as well as on irrigated areas.

Of the irrigated area, 3,800 acres were cultivated under kharif and 16,111 acres under *rabi* crop, against 5,287 and 2,423 acres, respectively, in the preceding year. The increase of 13,688 acres under the *rabi* crop is satisfactory. Rupees 7,283 were remitted by the Local Administration during the year 1892-93, and of this amount a sum of Rs. 3,338 was on account of irrigation revenue remitted.

5. The following table shows the distribution of the working expenses :—

	1891-92.	1892-93.	Increase (+) or Decrease (-).		
			Rs.	Rs.	Rs.
New Works, Maintenance and Repairs	85,183	77,192	—7,991		
Establishment	19,707	20,862	+1,155		
Tools and Plant	—352	—1,483	—1,131		
Leave and Pension Allowances	2,165	2,278	+113		
TOTAL	1,06,708	98,849	—7,854		

There is a decrease in the working expenses of Rs. 7,854 as compared with the figures of the previous year, and the increase in the irrigated area has reduced the cost of working expenses per acre from Rs. 8.90 in the preceding year to Rs. 2.72.

The establishment charges were divided as follows :—

	Rs.
Direction	7,719
Executive	7,930
Civil Officers	5,213
	20,862

The outlay on new works and repairs was Rs. 767 and Rs. 76,425 respectively. The maintenance charges were still high owing to famine relief works remaining in progress during a portion of the year.

6. The average results of the experimental cutting of crops of different kinds referred to in paragraph 6 of the review on last year's report have not been given, as it is said, in paragraph 15 of the present report, that the

returns furnished are so patently inaccurate that neither details nor average results can be usefully included in the report. Enquiries are, however, being made by the Local Administration into the subject, and rules for conducting these experiments in a more satisfactory and reliable manner have been framed and will be introduced with the approval of the Supreme Government. The value of crops raised during the year is estimated at Rs. 5,90,961, against Rs. 1,93,591 of the preceding year.

7. Some information regarding the measurement of the depth of water in wells has been furnished in paragraph 16 of the report. Of the 482 wells, of which the measurement of the spring level was taken between the 15th and 25th September 1892, and on the 10th April 1893, 270 were benefited by tanks and 212 were independent of tanks.

In Ajmere, out of 65 wells which derived benefit from the tanks in their vicinity, the spring level of only 38 wells registered in September 1892 had decreased by the following April, and of the remainder the level was practically unchanged.

In Merwara, out of 205 wells benefited by tanks, the spring level in 123 had decreased by April 1893, as compared with the level in September 1892. In the remaining wells the water had either increased or showed no substantial difference.

8. In last year's report figures of discharge and duty were not given in Statement I. E. as originally submitted, but were, as explained in paragraph 8 of the review, furnished subsequently. This year the information has been furnished in Statements I. E. attached to the report. Figures for three tanks in the Merwara District, *viz.*, the Bulad new and old tanks and the Jalia new tank, and three tanks in the Ajmere District, *viz.*, the Bhir new tank, the Rajaosi tank, and the Ladpura new tank, have been furnished. There was no irrigation from the Chitar tank in the Merwara District and from Makrera new and old tanks in the Ajmere District.

9. The Report has been correctly prepared and the sketch maps of the Ajmere and Merwara Districts furnished.

ORDER—Ordered, that a copy of this Review be forwarded to the Agent to the Governor General and Chief Commissioner, Rajputana, for information.

CIVIL WORKS—Irrigation.

Calcutta, the 22nd January, 1894.

Read—

Administration Report of Irrigation Works in the Madras Presidency for 1892-93.

OBSERVATIONS.—The number of Major Works in the Madras Presidency dealt with in the Report is ten, as in the previous year. Work on the Kalin-garoyen channel, which is a sanctioned project, has not yet been begun. Of the ten works, eight are in full operation, and the construction estimates of five of these have been closed. Of the remaining two, one, the Periyar, is still under construction; and for the other, the Rushikulya, which is classed as a Protective Work, a Revenue Account was opened during 1892-93.

The number of Minor Works for which Capital and Revenue Accounts are kept remains at 23, of which 19 are irrigation systems, and 4 are tidal canals.

2. The Capital outlay incurred on these Major and Minor Works during and up to the end of the year under review was as follows:—

	Number of works.	DURING THE YEAR 1892-93.								Total direct and indirect to end of 1892-93.

* Excluding Védárauniyam canal, for which complete Capital account to end of 1892-93 has not yet been prepared.

3. Under Major Works the Capital outlay was almost entirely confined to the Kistna, Periyar and Rushikulya projects, on which it amounted respectively to Rs. 3,27,812, Rs. 13,48,377 and Rs. 5,08,065, inclusive of indirect charges.

The outlay on the Kistna project was principally on the eastern section for miscellaneous works. The widening of the Bantumilli canal in that section was completed. On the western section the widening of the Main canal was in progress.

On the Periyar project, work in No. I or reservoir division was much impeded by rain and heavy floods during the first half of the year, and progress on the main dam was comparatively slow, though greater than in 1891-92. The height of the dam was raised by about 20 feet during the year. The total amount of material put into the dam during the working season amounted to 903,118 cubic feet, and it is estimated that 3,739,460 cubic feet remained to be done at the close of the year. If the above rate of progress

were maintained, the work would be completed in four years; but it is stated that the outturn in future seasons will probably be lower, and the date of completion proportionately postponed. Work on the watershed-tunnel was retarded by the breaching of the reservoir which supplies the turbine at the north end, and subsequently the supply to the turbine failed early owing to short rainfall. Out of a total length of 5,704 feet, 3,658 feet had been bored by the close of the year, the work done during the year being 1,250 feet. In the No. II, or plains, division good progress was made with the distribution works.

On the Mahanadi section of the Rushikulya project, good progress was made with the Gulleri head-works and the Russelkonda reservoir, and the Goomsur head-works were completed. On the Rushikulya section, the main canal was nearly completed and progress made with the Surada reservoir. Water was let down this canal in June 1892, and down the Mahanadi canal in September.

The principal Capital outlay under the head Minor Works was on the Buckingham canal, and amounted to Rs. 1,90,968. A new lock was constructed and some improvements and diversions carried out.

4. The length of completed main canal on the major works amounted to 2,036 miles, and of distributary 5,590 miles. On both Major and Minor Works the length of navigable channel was 1,284 miles.

5. The revenue receipts and working expenses of each work for which Capital and Revenue Accounts are kept are shown in the following statement:—

Serial number.	System.	Capital outlay.	GROSS REVENUE RECEIPTS, 1892-93.			WORKING EXPENSES.			Net actual revenue.	Deduct receipts and charges on account of old irrigation.	Net revenue attributable to outlay of Government capital.	Percentage of return.

* These include the amounts of indirect revenue for 1891-92 which were intimated to the Madras Government by the Board of Revenue after the accounts for that year were settled.

6. The gross revenue derived from the Major Works shows a satisfactory increase of Rs. 3,97,126 over the previous year. The working expenses were higher by Rs. 85,077, but the net revenue was more by Rs. 3,12,049. There was an increase in net revenue under all the Major systems, except the Srivaikuntham anicut and the Karnul canal. The former is accounted for by large remissions having been granted owing to the season in the Tinnevelly district, being unfavourable. On the Karnul canal there was a much smaller demand for water for dry crops, the season having been good. A most marked recovery occurred on the Pennér and Sangam systems, the net revenue of Rs. 72,241 and Rs. 86,275 in 1891-92 rising to Rs. 2,26,239 and Rs. 2,29,940.

7. The figures for the Minor Irrigation Works for which Capital and Revenue Accounts are kept, given in para. 5, require some explanation. The total net revenue from these works in 1892-93 is shown as amounting to Rs. 20,71,315 against Rs. 2,19,450 in the previous year. But the figures for 1892-93 include a sum of Rs. 7,80,467 from the systems Nos. 5, 6, 7, 11, 13, 14, 15 and 16, which was the revenue derived in 1891-92, but for which the figures were not communicated by the Board of Revenue in time to be included in the report for 1891-92. The correct figures for the net revenue from this class of works in the two years thus become:—

	Rs.
1891-92	9,99,917
1892-93	12,90,848

The increase may be considered satisfactory.

Under Navigation Minor Works, the Buckingham canal shows much better results than usual, with a deficit of only Rs. 18,590 as compared with Rs. 74,599 in 1891-92. The improvement is attributed to the persistent efforts made to keep down working expenses, which were less than in 1891-92 by Rs. 54,521.

8. From Statement I. C. attached to the Report, it appears that the total Irrigation Receipts from the Major Works amounted to Rs. 83,64,231, and that this sum was divided into Rs. 78,56,986, which is the share of the land revenue on account of the water supplied, or in other words the water-rate, and Rs. 5,07,245 representing the irrigation share of the enhanced land revenue.

9. In the following statement the irrigation receipts are compared with the areas under first and second crops charged as irrigated:—

System.	Revenue derived from irrigated lands.		Area charged as irrigated.		Rate per acre.	
	1892-93.	1891-92.	1892-93.	1891-92.	1892-93.	1891-92.

GRAND TOTAL	1,07,89,708	85,96,678	2,843,018	2,792,589	3.8	3.1

The area under Major Works charged as irrigated, was less in 1892-93 than in 1891-92 by 21,254 acres, but the revenue derived was more, as the large remissions of the previous year were not found necessary. The area under Minor Works was greater by 71,683 acres than in 1891-92.

10. Details of the average water-rate for wet crops and irrigated dry crops are now given on page 7 of the Report. The figures are summarised in paragraph 7 of the review by the Madras Government on the report. For the Major Works they are as follows :—

	FIRST CROP.						SECOND CROP.	
	GOVERNMENT LANDS.		ZAMINDARI LANDS.		INAM LANDS.			
	Wet crop.	Dry crop.	Wet crop.	Dry crop.	Wet crop.	Dry crop.

Srivaikuntham anicut	6.35	2.37	3.86	3.61	3.95	1.75	3.24	

The rates for wet crop (rice) appear low as compared with the rates obtaining in other parts of India for the same crop.

11. The area charged as irrigated under first crop by the Major Works amounted to 2,152,718 acres, and under second crop to 191,008 acres, or a total of 2,243,726 acres. The difference between this total and that given in column 4 of the table in paragraph 9 is due to the inclusion in the latter of the extent of "waste charged." The proportion of flow to lift irrigation was about 27 to 1.

12. The following statement shows the details of the working expenses, including the old maintenance charges, for each of the Major systems, and for the Minor systems in the aggregate :—

System.	1892-93.					1891-92.
	New Works and Repairs.	Establishment.	Tools and Plant.	Indirect charges.	Total.	Total.

GRAND TOTAL	11,55,010	10,93,308	86,463	1,23,082	24,57,863	24,78,309

The cost of maintaining the Major Works was about 23 per cent. of the gross, and 30 per cent. of the net revenue derived therefrom.

13. The charge for establishment in column 3 of the last statement is made up thus :—

		Major Works.	Minor Works and Navigation.	TOTAL.	
				Rs.	Rs.
Revenue management	Direction and Executive	4,90,244	11,967	5,02,211

	GRAND TOTAL	9,41,378	1,51,930	10,93,308	

The cost of revenue management of Major Works was about 9 per cent. of the gross revenue.

14. Of the irrigated crops, rice constituted 95 per cent. The estimated total value of all the crops irrigated by the Major and the principal Minor Works was 777 lakhs, which is more than the total capital cost of these systems.

15. The following figures give details regarding navigation on the principal canals :—

Corresponding figures of previous year	1,233	2,27,943	3,29,565	6,29,43,102	39,652,011

The figures for 1892-93 show a considerable improvement over those for 1891-92.

16. Besides the Major and Minor Works for which Capital and Revenue Accounts are kept, dealt with above, there are a very large number of tanks and channels for which neither Capital nor Revenue accounts are kept, and the indirect receipts from which are not credited in the books of the Public Works Department. The more important of these works are maintained by the Public Works Department, the smaller ones by the Revenue Department. The systematic repair of some of these works has now been in progress for some years, under the title of the "Tank Restoration Scheme." The following

are the principal figures relating to these works, class I being those under the Public Works Department for which a continuous record of expenditure is maintained; class II other works under the Public Works Department; class III works under the Revenue Department:—

Class.	Area, 1st and 2nd crop.	Irrigation revenue.	Rate per acre.	Outlay, direct and indirect, and collection charges.	Rate per acre.
1	2	3	4	5	6
I . .	226,812	7,76,969

Total, 1891-92 .	2,720,872	62,11,070	2.32

The figures for 1892-93 show a substantial improvement over those for the previous year owing to the better rainfall.

17. The outlay on Agricultural Works, principally river embankments and conservancy, was as follows:—

	Rs.	Rs.
Original works	88,734	
Repairs	2,27,727	
		3,16,461
Establishment	71,492	
Tools and plant	4,450

18. Six investigating parties were at work on the Tank Restoration Scheme, the expenditure, which is included in that given in paragraph 16, being as follows:—

	EXPENDITURE DURING 1892-93.					Expenditure to end of 1892-93.
	Works.	Repairs.	Establishment.	Tools and plant.	Total.

Up to the end of the year 26,874 square miles had been investigated, estimates for 3,545 works had been prepared, and projects for a sum aggregating 37 $\frac{1}{2}$ lakhs had been sanctioned.

19. The following figures relate to the discharge of some of the principal canals :—

20. The report was received by the Government of India on 27th November 1893. It was the first of the Revenue Reports to be received, and its early receipt is an extremely satisfactory feature. RESOLUTION.

Calcutta, the 6th February 1894.

Read—

Resolution in this Department, No. 3624 A., dated 18th August 1893, regarding the grant of exchange compensation allowance to European and Eurasian officers of Government not domiciled in India.

RESOLUTION.—The Resolution of the 18th August 1893 applies only to officers whose salary is chargeable to General Revenues. Exchange compensa-

tion allowance is therefore not admissible under that Resolution to Government officers in foreign service.

As regards Government officers in foreign service, the Government of India, so far as they are concerned, agree to the grant of exchange compensation allowance under the restrictions and rules of the Resolution last quoted. But as the allowances will not be payable by the Government of India but by the Foreign employer, the claim in each case must, subject to any conditions imposed by statute, or by trust provisions, be decided, in the case of foreign service of the first kind, by the orders of the employer to whom the officer's services have been lent, and in the case of service of the second and third kinds, with the consent of the controlling authority of the funds to which the allowance will be chargeable.

In cases in which exchange compensation allowance is granted to an officer in foreign service of the first kind, as defined in Article 802 of the Civil Service Regulations, the allowance should be calculated on "assumed pay" as defined in Article 808 of those Regulations. In other cases, it should be calculated on the actual sanctioned salary of the officer.

ORDER.—Ordered, that this Resolution be communicated to the several Departments of the Government of India, to all Local Governments and Administrations, to all Heads of Departments subordinate to the Finance Department; to the Comptroller and Auditor General; and to all Accountants General and Comptrollers.

Ordered also, that the Resolution be published in the *Gazette of India*.

Letter No. 1690 I., dated 30th November 1893, from the Government of the Punjab forwarding the Revenue Report of Irrigation Works in the Punjab for 1892-93, and Resolution by that Government reviewing the Report.

OBSERVATIONS.—The Capital outlay incurred during and up to the end of 1892-93 is shown in the following statement under the financial heads of account:—

† Includes Capital outlay on Madhopur workshops.

2. The total outlay during the year was Rs. 27,77,396 being less by Rs. 19,09,998 than the total outlay during 1891-92, the difference being caused principally by the decreased expenditure on the Chenab Canal.

On the Chenab Canal, the Capital outlay was Rs. 15,57,985. The principal outlay against the original estimate was on strengthening the Protection

Works on the right flank of the Weir at Khanki and on completing distributary systems. On the Chenab Canal Extension Project, for which sanction was received in August 1892, good progress was made in widening the Main Line and on the construction of the Jhang and Bhawani Branches and works in connection therewith.

On the Bari Doab Canal, the Capital outlay during the year was Rs. 2,41,324, principally on constructing and remodelling distributaries.

On the Sirhind Canal, there was a Capital outlay from Imperial Funds of Rs. 1,60,286, principally on works which were in progress at the time of closing the construction estimate. Under contributions there was a Capital outlay on works of Rs. 3,697, but there were credits under Tools and Plant, Suspense, and Receipts on Capital Account amounting to Rs. 24,877, so that the net result was a reduction of Capital outlay by Rs. 21,180.

On the Western Jumna Canal, excluding the Sirsa Branch, there was a Capital outlay of Rs. 1,01,926, incurred principally on Drainage Works and Distributaries. The Drainage Works, as noted in paragraph 21 of Chief Engineer's report, have had an excellent effect and are practically completed.

On the Sirsa Branch of the Western Jumna Canal, Rs. 6,36,372 from Imperial Funds and Rs. 2,49,083 contributed by the Patiala State were expended on the Capital Account. Two out of the three sections into which the project is divided have been practically completed, and the whole of the construction work is expected to be finished before the end of 1894-95.

The length of navigable channel was 386 miles.

In addition to the above, there are in the Native States 223 miles of completed canal, of which 46 are navigable, and 1,940 miles of completed distributaries.

During the year the length of canal has been increased by 83 miles, and of distributaries by 252 miles, all in British territory.

* Refunds deducted from Revenue.

† These percentages of net Revenue on Capital outlay do not include Muzaffargarh Canal.

5. The net Revenue for the whole Province is higher by Rs. 5,55,587 than it was in 1891-92, and the percentage on Capital outlay has risen from 6.17 to 6.79.

The Major Works show an increase in net revenue of Rs. 5,68,466, while the Minor Works show a decrease of Rs. 4,364, which, together with a decrease of net Revenue on the Muzaffargarh Canal of Rs. 8,515, accounts for the net increase over the whole Province.

Under Major Works, the Bari Doab and Sirhind Canals show a large increase in net Revenue, while there is a large decrease on the Western Jumna Canal owing to the areas irrigated in the Rabi of 1891-92 and the Kharif of 1892-93 having been smaller than usual.

This year the Swat River Canal gives a return of 5.20 per cent. of net Revenue on Capital outlay, but from paragraph 12 of the Chief Engineer's report there appear to be grounds for apprehension that the country irrigated by this canal may soon become waterlogged if the increase of area irrigated be not checked, and a detailed statement of his views is awaited by the Local Government.

The only Major Works which failed to meet their working expenses were the Chenab and the Lower Sohag and Para Canals. The Chenab Canal cannot yet be expected to pay its way, and the Chief Engineer in paragraph 139 of his report states that there is every reason to hope that the Lower Sohag and Para Canal will give large returns in the near future.

Under Minor Works, the Upper Sutlej and the Shahpur Canals show a satisfactory increase of net Revenue over last year, and the Indus Canal returns, though lower than those of last year, which were abnormally high owing to the recovery of arrears of collections, show an improvement on the figures of former years.

The net Revenue of the Lower Sutlej and Chenab Canals is about the average of ordinary years, while that of the Muzaffargarh Canals is slightly below it.

6. The net Revenue of the Major Works in operation exceeded the interest charges by Rs. 17,91,956, and at the close of the year the balance of net Revenue over interest charges for the whole Province amounted to 241 $\frac{3}{4}$ lakhs of rupees.

7. The area irrigated during the year and the irrigation revenue assessed thereon are shown in the following statement:—

8. The total area irrigated, though less by 218,005 acres than last year, is the second largest area on record.

The rainfall during the winter was abnormally great, and in most parts of the Province enabled crops to be brought to maturity without the aid of canal water.

The rate per acre for the whole Province has again fallen below that of the previous year; it is higher on most of the Minor Works, while on four of the Major Works it is higher, and lower on the remainder.

9. The areas of kharif and rabi crops were as follows:—

	Kharif.	Rabi.
	Acres.	Acres.
Perennial Canals	681,124	817,781
Inundation „	637,694	712,732
TOTAL	1,318,818	1,530,513

Compared with last year the kharif irrigated area has increased and is the largest for the past five years. The rabi irrigation on the other hand has decreased largely on the perennial canals and slightly on the inundation canals. The cause of the decrease on the perennial canals is the abnormal winter rainfall.

10. The following table shows the irrigated areas of the principal crops for the last two years:—

	1892-93.	1891-92.
	Acres.	Acres.
Sugarcane	72,902	91,238
Rice	170,282	184,637
Jowar	177,758	157,146
Maize	122,235	114,879
Wheat	957,635	1,120,982
Cotton	216,599	188,072

The decrease under sugarcane occurred on the Western Jumna Canal and is due to the low supply of water in the Jumna River in April and May 1892.

The decrease under rice is attributed to a similar cause.

The increase under jowar and maize is due to these crops having been sown to take the place of crops which could not be sown earlier owing to short supplies during the early kharif.

The decrease in wheat is due to the abnormally heavy winter rains.

Cotton, which suffered greatly last year from the attacks of locusts, has somewhat recovered.

The value of the crops irrigated is estimated at 826 lakhs of rupees.

11. Details of the discharges and water duty of the perennial canals, together with the minimum discharges of the rivers from which their supplies are drawn, are given in the following table:—

CANAL.	MINIMUM DISCHARGE OF RIVER.		MAXIMUM DISCHARGE OF CANAL AS DESIGNED.	MAXIMUM DISCHARGE OF CANAL DURING YEAR.	AVERAGE DISCHARGE AT HEAD.		ACRES IRRIGATED PER CUBIC FOOT OF AVERAGE DISCHARGE.			
					Kharif.	Rabi.

Chenab	5,763	8,000	2,000	1,553	1,135	54	65			

* Excluding Native States Branches.

The minimum river discharges are, with the exception of the Swat River, higher than last year. The kharif duties are generally about the average of the last five years, while the rabi duties are all low. Supply exceeded demand during the greater part of the winter, and the rabi duties therefore do not compare favourably with those of seasons in which the contrary was the case.

The duty on the Chenab Canal is expected to improve as the area under irrigation increases.

12. On the Native States Branches of the Sirhind Canal the irrigation is still below the area which would have been obtained on British Branches from similar volumes of water. The proportion obtained remains as it was last year, *viz.*, 58 per cent., and the Chief Engineer, in paragraph 109 of his report, mentions that it would almost seem as if we should have to be content with an area only three-fifths of what would be irrigated did the States work up to the British standard.

13. The following table shows the working of the Native States Branches:—

STATE.	Capital outlay.	Gross revenue collected less refunds.	Working Expenses.	Net Revenue.	Percentage on Capital Outlay.	Water-rates assessed.	Area irrigated.	Water-rates assessed per acre.	Working Expenses per acre.

The figures for the year under review are far from satisfactory. The percentage on Capital outlay, which in Patiala is 2.84 as compared with 2.78 for last year, has in Nabha fallen from 2.30 to 0.87, and in Jhind there was a loss equivalent to 0.40 per cent. on the Capital as against a profit of 1.89 per cent. in the previous year. The working expenses per acre are also very high, being Rs. 3.23 per acre as against Rs. 1.76 in 1891-92.

The value of the crops irrigated during the year from the Native State Branches is estimated at Rs. 39,68,512.

14. The working expenses of the different canals are shown below:—

Per acre irrigated	0.79	0.83

The total working expenses are more by nearly two lakhs of rupees than last year, the increase being due almost entirely to additional expenditure on the Sirhind and the Chenab Canals. In the latter case the increase is due to the expansion in length of irrigating channels and area irrigated, and in the former case it occurs largely under establishment and is due to the decreased capital expenditure.

The rate per acre irrigated has risen in the case of the Major Works on account of the smaller area irrigated.

15. The following are the details of the charges for establishment:—

	Revenue management.	Maintenance.	Total.	Percentage.
				Rs.
Direction	82,106	80,448	1,62,554	12.14
Executive	6,55,930	2,79,523	9,35,453	69.88

Navigation	1,154	...	1,154	0.08
TOTAL	9,67,105	3,71,542	13,38,647	100.00

The share of direction charged to revenue is higher than in 1891-92 because of the smaller capital outlay.

16. The working expenses on Major Works amounted to 36 per cent. of the gross revenue realised as against 37.2 per cent. last year.

17. The following are some of the principal works charged against the Revenue Account:—

On the Swat River Canal.—Increasing the capacity of two drainage inlets.

On the Western Jumna Canal.—Regulating apparatus for Tajewala Dam, constructing Kachrauli Drain, wire rope suspension bridge on Hansi Branch, renewing with cast-iron grooves eight bays of the Tájawála undersluices.

On the Bari Doab Canal.—Building quarters for the regulating establishment at Madhopur, remodelling and constructing distributaries.

On the Sirhind Canal.—Alterations below Chupki and Akhalgarh Falls for facilitating navigation, construction of four ferries and a discharge run on Abohar Branch, minor head gates and gearing for Ladianah Division.

On Chenab Canal.—Four rest-houses for Ziladars and a workshop at Salar.

On the Indus Inundation Canals.—Reconstruction of head regulator of the Baja Branch of Manka Canal, addition to the head regulator Shoria Canal and construction of Gajani Branch and Western Distributaries, constructing Fauja and Borwala reclamation bunds.

18. The navigation receipts and charges are shown in the margin. The

	Receipts. Rs.	Charges. Rs.

increase in traffic which followed on the revision of rates for rafting mentioned in paragraph 19 of last year's review has not been maintained: it yet remains to be seen whether the decrease which has occurred in the year under review will prove to be merely temporary.

1. The net profit on navigation operations amounted to only Rs. 19,672 during the year.

19. The receipts on account of water power amounted to Rs. 1,51,101 as compared with Rs. 1,65,377 in 1891-92. The decrease is due to the longer closures of canals owing to slackness of demand.

20. On the Lower Sutlej and Chenab Canals and the Muzaffargarh Canals the value of "chher" labour and the sums contributed from the Zar-i-nagha funds are included in miscellaneous receipts.

On the Lower Sutlej and Chenab Canals 638,598 labourers were called out, and of these 455,880 were actually present. After allowing for 36,326, whose absence was sanctioned, the total number of absentees was 176,392 or a percentage of 26.37 as against 32.13 of last year. Fines amounting to Rs. 94,994 were inflicted.

The value of "chher" labour, as shown in the administrative accounts, was Rs. 92,021, but in paragraph 201 of the Chief Engineer's report it is stated that the correct value is Rs. 1,80,720, the error having arisen from the full value of the labour not having been reported.

The error does not affect the balance of expenditure and receipts as the assumed value of "chher" labour is shown on both sides of the account: Contributions from the Zar-i-nagha fund amounted to Rs. 81,611.

On the Muzaffargarh Canals the numbers of labourers were—

Called out	494,074
Present	437,309
Absent with sanction	17,249
Absent without sanction	45,258

Fines for absence amounted to Rs. 26,217.

The value of "chher" labour was Rs. 1,12,514, and Rs. 18,756 were contributed from the Zar-i-nagha fund.

The Zar-i-nagha funds on the Lower Sutlej and Chenab Canals and the Muzaffargarh Canals show credit balances of Rs. 1,10,126 and Rs. 62,202 respectively.

21. The year opened with an unrealised demand of Rs. 67,260, after deducting Rs. 756 as detailed at foot of table IIIC, and closed with an unrealised balance of Rs. 88,818. The demands during the year amounted to Rs. 61,22,593, and the collections to Rs. 61,01,035.

22. Two new points of interest are noted in the Resolution by the Local Government, *viz.*—

(1) The results of the checks applied to the measurements of the irrigated area. Paragraphs 42, 72, 106 and 134 of the Chief Engineer's report deal with this subject, and the results are considered to be on the whole exceedingly satisfactory.

(2) The time spent on tour by Divisional and Sub-divisional Officers. The former Officers were away from head-quarters on tour during 182 days or half the year on the average, and the latter were on tour an average of 246 days or two-thirds of the year.

23. The report reached the Government of India on the 4th December, the date prescribed for its submission being the 15th November. It has, as usual, been prepared with great care, and is illustrated by excellent maps and diagrams. The results set forth in it are once more satisfactory, and the Government of India have much pleasure in endorsing the praise accorded by the Honourable the Lieutenant Governor to Colonel Ottley and Mr. Higham in paragraph 22 of the Resolution by the Local Government.

SANITARY.

The 14th February, 1894.

No. 52.—The following translation of the Special Regulations of the Ottoman Board of Health, applicable to the Mecca Pilgrimage of 1894, received through Her Majesty's Secretary of State for India, is published for general information:—

Special Regulations applicable to the Meccan Pilgrimage of 1894 (year of the Hegira 1311).

Article 1.—From the beginning of the month of Rajab until the end of the month of Zilhijja

(that is to say, from the 8th January to the 2nd July), the lazaretto of Camaran will be open to receive arrivals by sea subject to quarantine.

Article 2.—During the period of these six months (Rajab, Shâbân, Ramazân, Shawwâl, Zilkaada, Zilhijja), pilgrim vessels coming from beyond the Straits of Bab-el-Mandeb, whatever the tenor of their Bills of Health, must proceed direct to the Island of Camaran, without calling at any other port on the littoral of the Red Sea.

Article 3.—Pilgrim vessels are vessels which are chartered to carry pilgrims proceeding to the Hedjaz.

Article 4.—Vessels bound for the Red Sea having on board not more than one pilgrim for every hundred tons of registered tonnage are not included in the definition of pilgrim vessels. Such vessels will be dealt with according to the tenor of their Bills of Health, conformably to the General Regulation of 1867 applicable to arrivals from cholera-infected places.

Article 5.—Vessels carrying not more than five pilgrims for every hundred tons of registered tonnage can proceed to Abu-Saad, where they will discharge their pilgrims and merchandise subject to quarantine destined for the Hedjaz.

Quarantine will also be performed at Abu-Saad by the *sambouks* and other coasters subject to quarantine proceeding from one port to another of the Red Sea littoral.

Article 6.—For this purpose a lazaretto is established at Abu-Saad, as a branch of the Camaran lazaretto, which will be open throughout the year to arrivals specified in Articles 4 and 5 of this Regulation.

Article 7.—Vessels upon which cases of cholera or suspicious cases have occurred, either in the port of embarkation or during the voyage, will undergo (both vessels and pilgrims) quarantine for 15 days at Camaran. This quarantine will be renewed each time a cholera case occurs among crew or passengers after their arrival at the lazaretto and will date from the last case of sickness. In such cases, the provisions of the Cholera Regulation of 1867 will be strictly applied.

Article 8.—When a batch of pilgrims has suffered from cholera during their stay at Camaran, they will not be admitted to free pratique at Jeddah until they have undergone a supplementary quarantine for five days and rigorous disinfection at the lazaretto at Abu-Saad.

Vessels carrying such pilgrims may, however, clear in quarantine in conformity with Article 16 of the principal Regulation after landing at Abu-Saad the pilgrims and their baggage, and merchandise destined for Jeddah.

Article 9.—Indian or Malay pilgrims who take the indirect route *via* Suez to the Hedjaz will be subjected to quarantine, unless they can prove, on their arrival at Jeddah, by their passports or other official documents, that they have come from beyond the Suez Canal, or that they have spent at least ten days in Egypt, in free pratique and in good health.

Vessels embarking at Suez Indian or Malay pilgrims who do not fulfil these conditions will be treated as infected, and will have to proceed to Camaran, at any rate in certain cases, to

undergo quarantine there, according to the country of origin of the pilgrims in question.

Article 10.—Merchandise destined for Yemen not susceptible of infection can be landed at Hodeida under the supervision of the sanitary authority.

Article 11.—Vessels from beyond the Suez Canal and Egypt with unclean Bills of Health must proceed to Camaran for quarantine.

Article 12.—Pilgrim vessels which arrive from ports where cholera exists, but have had no cholera case during the voyage or after arrival, will undergo (vessels and pilgrims) a quarantine of ten days. Merchandise coming from a cholera-infected port will remain on board, if there have been no cholera cases during the voyage or after arrival, and will be exempt from disinfection and from sanitary fees, except in the case of old personal effects and stuffs already used, unwashed wool, old cottons, horse hair and feathers, raw hides, and other raw animal products, as well as rags of all kinds, which will be subject to the provisions of the Cholera Regulation of 1867.

Article 13.—No pilgrim vessel, even when admitted to free pratique, will be allowed to leave Camaran without re-shipping, after the performance of their quarantine, all the pilgrims brought by her.

Article 14.—Vessels coming from the Persian Gulf and Zanzibar, with pilgrims on board, bound for the Hedjaz, will also proceed to Camaran, but will be treated, according to the tenor of their Bills of Health, in the manner provided by the Cholera Regulation of 1867.

Article 15.—*Sambouks* coming from beyond the Straits of Bab-el-Mandeb with pilgrims will be subject to the same rules as vessels specially chartered for pilgrims. They must proceed direct to the anchorage of Camaran, and will be excluded from all other Arabian ports on the Red Sea.

Article 16.—The embarkation on board pilgrim vessels of live animals, as well as hides, animal products, rags of all kinds, coal, petroleum, and all other inflammable or explosive material except such coal and animals as are necessary for the service and provisioning of the vessel during the voyage, is strictly prohibited.

Article 17. All vessels embarking more than 100 pilgrims must be provided with a medical man licensed by authority in the country of departure, as well as with medicines, disinfectants, and articles necessary for the care of the sick. A special place must be arranged on the deck as a hospital. Attendance and medicines will be given gratuitously.

Article 18.—On the arrival of a pilgrim vessel at Camaran or Abu-Saad, as the case may be, all pilgrims will be disembarked and undergo the usual medical examination. If the condition of the vessel is good, and no suspicious case has occurred during the voyage, the vessel and the pilgrims will undergo five full days' quarantine, and their clothing and effects will be disinfected; but the cargo will be subject to the provisions of the Cholera Regulation of 1867.

Article 19.—The sanitary authority will not allow the departure of a pilgrim vessel from any port in the Empire, without assuring him-

self that it satisfies the following conditions, *viz.*, that the vessel is fit to undertake the voyage without danger; that she is well-equipped, well-regulated, well-ventilated, provided with a sufficient number of boats, and that she contains nothing on board that is or may become injurious to health or prejudicial to the safety of the passengers; that there are on board suitably stored, besides the provisions of the crew, food, drinking water of good quality, and fuel in sufficient quantity for all the pilgrims and for the entire declared duration of the voyage. This last provision, however, in so far as it concerns food, is strictly applicable only to vessels passing the Straits of Bab-el-Mandeb. For all other vessels the Captain is bound to have food only in the proportion necessary for the wants of the pilgrims who may have contracted to be fed on board during the entire voyage. The sanitary authority will refer to the authority to which the vessels are subject for the application of those of the above provisions which do not concern him directly.

Article 20.—Every pilgrim vessel which does not conform to the provisions of the present Regulation will be held to have contravened sanitary rules and be liable to extreme measures regarding quarantine.

Article 21.—Vessels carrying pilgrims are strictly subject to the following instructions concerning the measuring of pilgrim vessels:—

Read and adopted in meeting of the Superior Council of Health, the 10th and 22nd December, 1891, and amended the 23rd and 25th December, 1893.

Instructions regarding the measurement of Pilgrim-ships referred to above in Article 21.

1. Only steamers and ships propelled partly by steam and partly by sail are authorized to carry pilgrims on voyages beyond the Straits of Bab-el-Mandeb or beyond the Suez Canal.

2. The space to be given to each pilgrim irrespective of age or sex shall be at least 9 superficial feet and 54 cubic feet between decks. No passenger shall be accommodated in the ship's hold, and the deck, free of all goods, shall be reserved for the use of the crew and the passengers travelling between decks.

3. Any ship which can produce an official certificate, furnished by the authority on which it is dependent, proving its capacity with regard to the number of passengers that can be embarked, shall not be liable to a second measurement, except in the event of the size, capacity, and arrangements of the ship being found by the sanitary authority not to be in

accord with the number of passengers shown in the certificate.

4. Any ship sailing under the Turkish flag which is unable to produce an official certificate of measurement shall be measured by a competent officer of the Imperial Marine, to be named by the local authority, with the assistance of the sanitary authority of the port where the ship happens to be. The service rendered by the sanitary authority in such a case is gratuitous.

As regards ships belonging to a foreign marine and not possessing official certificates of measurement, the sanitary authority shall give them the opportunity of producing the documents required in communication with their respective Consuls. The Consul can, if he so desires, cause the measurement in question to be made by the competent local authority in accordance with the requirements of Article (2) above.

5. The sanitary authority shall refuse to give a Bill of Health to any ship which has embarked pilgrims without the necessary certificate.

Read and adopted in meeting of the Superior Council of Health, the 10th and 22nd December, 1891.

Review of the Revenue Report of Irrigation Works in Bengal for 1892-93.

READ—

The Revenue Report of Irrigation Works in Bengal for 1892-93, and the Resolution thereon by the Government of Bengal, No. 1284 I.A., dated the 28th November 1893.

OBSERVATIONS.—The canal systems in Bengal for which Capital and Revenue Accounts are kept are, as formerly, seven in number, four being Major Works, and three Minor Works. One Major Work and two Minor Works are for Navigation only.

The Capital outlay on these works during and up to the end of 1892-93 was as follows:—

	Number of works.	DURING THE YEAR 1892-93.							
		Works.	Estab- lish- ment.	Tools and Plant.	Suspen- se account.	Total direct charges.	Indirect charges.	Total direct and indirect charges.	Total direct and in- direct to end of 1892-93.

2. The direct Capital outlay on the Orissa Canals was Rs. 3,63,215, the principal expenditure being on the extension and remodelling of the Taldanda Canal and on the construction of distributaries and embankments. There was no change in the length of canals during the year, but 50 miles of distributaries were completed.

On the Sone Canals, the direct Capital outlay was Rs. 56,252, principally on distributaries.

On the Hidgellee Tidal Canal, the direct Capital outlay was Rs. 38,319, principally on works connected with the remodelling scheme.

3. The length of Main and Branch Canals open at the end of the year was 916 miles, of which 673 miles are navigable, and of distributaries 2,431 miles.

4. The financial results of the year are shown in the following statement:—

5. There was a satisfactory increase of Rs. 2,37,281 in the net revenue realized from Major Works, but this result was due in a great measure to recovery of arrears effected by improved administration, and the increase cannot therefore be expected to be permanent.

The system of managing revenue collections by means of revenue divisions in charge of a Deputy Collector continues to work well, and this system, which during the year under review was in force on the Sone and Orissa Canals, has been extended to the Midnapore Canal from 1st April 1893. The work of the Deputy Collectors in charge of these Revenue divisions is favourably commented on by the Local Government in paragraph 6 of its Resolution.

The net revenue earned is the highest on record, and amounted to 0·63 per cent. of the Capital outlay as compared with 0·25 per cent. last year.

6. There was, especially on the Orissa Canals, a marked decrease in the demands remaining unrealized at the end of the year under review, as compared with 1891-92. The figures for the three Major Irrigation Works are given in the following statement:—

CANALS.	Balance unrealized at beginning of year.	Demands of year.		Total.	Less collections and remissions.	Balance unrealized at close of year.
		Rs.	Rs.			
Orissa	2,88,704	4,06,312	6,40,016	5,50,199	89,817	
Midnapore	58,972	2,71,110	3,30,082	2,81,515	48,567

TOTAL . .	4,04,120	17,25,055	21,29,175	19,03,001	2,26,174	

7. The following table exhibits the area irrigated and the Revenue assessed thereon for the three Major Irrigation Works:—

CANALS.	Area irrigated.		Assessed water-rates.		Per acre irrigated.	
	1892-93.	1891-92.	1892-93.	1891-92.	1892-93.	1891-92.
					6	7

Sone	410,761	474,723	8,15,158	9,82,032	1·98	2·07
TOTAL . .	662,930	736,381	11,95,358	13,77,864	1·80	1·87

The differences occur principally on the Sone Canals. As explained in paragraph 79 of the Chief Engineer's report, the new rules under the Irrigation Act, which were introduced in 1891-92, were fully in force during 1892-93. Under these rules the irrigation is assessed by seasons instead of by crops as formerly, and a comparison of the areas irrigated in the two years cannot therefore be made accurately.

The assessments for 1892-93 are lower than in 1891-92 on all three canals.

8. The irrigation during the kharif and rabi was as follows:—

CANALS.	Kharif.		Rabi.
	Acres.	Acres.	Acres.
Orissa	158,358	2,594	
Midnapore	91,217	...	
Sone	311,168	99,593	
TOTAL . .	560,743	102,187	

The areas irrigated by flow and lift were 643,792 acres and 18,958 acres respectively, or about 97 per cent. flow to 3 per cent. lift.

9. The principal crops irrigated were:—

	Acres.
Rice	508,371
Wheat	36,756
Barley	17,445
Sugarcane	39,007

The estimated value of the crops irrigated was 223 lakhs of rupees.

10. The details of working expenses, omitting the Eden Canal, are as follows:—

Of the maintenance outlay on the Orissa Canals, Rs. 53,456 were spent on head works, Rs. 1,23,060 on main canals, and Rs. 30,033 on distributaries. The excess expenditure as compared with 1891-92 was principally caused by repairs and improvements rendered necessary by high floods.

On the Midnapore Canal, Rs. 9,965 were expended on head works, Rs. 59,802 on main and branch canals, and Rs. 12,612 on distributaries. The large decrease on the main and branch canals as compared with 1891-92 is attributed partly to the thorough repairs carried out during the long closure of last year and partly to the close supervision exercised.

On the Sone Canals, Rs. 22,374 were expended on head works, Rs. 2,00,130 on main and branch canals, and Rs. 55,918 on distributaries. The increase in the total expenditure on main canals and distributaries was principally caused by a long closure of the Arrah Canal, during which extensive repairs and silt clearances were carried out.

11. The charge for establishment in the table in para. 10 is made up as follows:—

	Revenue management.	Maintenance.	TOTAL.	Percentage.
	Rs.	Rs.	Rs.	
Irrigation	22,367	22,367	44,734	5.30
Executive	2,12,401	2,12,400	4,24,801	50.38

GRAND TOTAL	6,08,485	2,34,767	8,43,252	100.00

The total cost of maintaining the Irrigation Major Works amounted to 79.3 per cent. of the gross revenue, of which 26.3 per cent. represents the charge for Revenue management.

12. The following figures relate to the complaints received and disposed of during the year:—

SYSTEMS.	Pending from pre- vious year.	Filed during year.	Total.	Disposed of.	Balance left pending.
Orissa	830	3,372	4,202	3,748	454
Midnapore	95	341	436	367	69
Sone	529	7,483	8,012	7,417	595
	1,454				1,118

The total balance left pending is 1,118 as against 1,454 last year.

There was a great increase on the Sone Canals in the number of complaints filed during the year, and this occurred principally in the Buxar Division where the increase was from 737 to 3,944. The cause assigned is that, in the case of the large rabi area of 1891-92, there was no time to check the measurement statements before the demand statements were despatched, and that afterwards mistakes were found to have occurred, but the explanation does not appear satisfactory.

13. The navigation receipts and expenditure for all works are shown in the following statement:—

CANALS.	Length of navigable canal.	Receipts.	Expenditure.
		Miles.	Rs.
Orissa Canal	205	1,19,394	20,758
Midnapore Canal	72	1,17,533	13,888

Total	1,150	10,84,124	5,72,759
Figures for 1891-92	1,150	11,42,587	6,88,537

There was a decrease in expenditure of Rs. 1,15,778, but receipts also fell off by Rs. 1,08,463.

14. The Navigation receipts are divided as follows:—

		Rs.
Tollage on private boats	•	9,64,786
" Government boats	•	14,512
" rafts	•	15,680
Transport service	•	27,984
Fines and sundries	•	11,162
	TOTAL	10,34,124

The aggregate ton-mileage amounted to $49\frac{1}{2}$ millions, the estimated value of the cargoes to 1,363 lakhs of rupees, and 612,668 passengers were carried.

15. The agreement regarding the Sarun Canals mentioned in paragraph 15 of last year's review, which was continued with slight modifications during 1892-93, has not proved satisfactory, and the future of these canals is uncertain.

The landholders who have proprietary rights in the river channels connected with the Eden Canal have lately seemed disposed to come to terms with Government, and it is hoped that an arrangement may be effected by which water from this canal will become available for irrigation and afford some return on the money expended.

16. The following table contains figures relating to the duty of water used for irrigation purposes:—

CANALS.	AVERAGE DISCHARGE, CUBIC FEET PER SECOND.				AREA IRRIGATED PER CUBIC FOOT PER SECOND.			
	AT HEAD.		UTILIZED.		DISCHARGE AT HEAD.		UTILIZED.	
	Kharif.	Rabi.	Kharif.	Rabi.	Kharif.	Rabi.	Kharif.	Rabi.

Sone . . .	4,098	2,494	3,529	1,580	67·06	50·60	77·85	79·87

17. The divergence between the sets of experiments on the outturn of

rice crops on the Orissa and Sone Canals, which was noticed in last year's review, still continues, as will be seen from the figures on the margin, and no explanation has yet been given. No experiments were carried out on the Midnapore Canal during the year under review.

18. The Revenue Report was received by the Government of India on the 6th December 1893, or about a month earlier than last year.

19. The Government of India have much satisfaction in noting the rapid progress made in the recovery of arrears of collections, especially in the case of the Orissa Canals, and also the good work done during the year by Mr. Odling and the officers of the department generally.
